

First National Bank is pleased to offer you IBM Trusteer Rapport!

IBM Trusteer Rapport is an optional security product that First National Bank is offering to our customers to protect sensitive financial information. This technology takes up where your current security software leaves off to prevent cyber criminals from obtaining your secure information. It will automatically remove any malware that your security software does not detect, and will immediately notify the bank's security and fraud team. This product is completely free of charge, fully respects your privacy and will not burden your computer.

This product will be launching very soon, and we strongly encourage all of our customers to take advantage of this product. You will be prompted after logging-in to your online banking account to download the product. First National Bank recommends that you obtain this software to protect your online banking account, but it is not required. For more information contact one of our customer service representatives.
